I am an experienced Full-Stack JavaScript Developer with over 6 years of expertise in building web applications using React and Node.js technologies. Throughout my career, I've had the privilege of working on impactful projects with different technologies. My contributions to these projects have been marked by a strong focus on creating efficient and user-friendly solutions. I've consistently delivered high-quality code, optimized application performance, and improved the overall user experience. I am passionate about using technology to solve complex problems and am a strong advocate for Agile methodologies and best coding practices.

I am a good team player, rationally distribute my time, easily adapt to the environment, self-motivated (creating something new inspires me), and can work under pressure. I thrive in dynamic and collaborative environments and look forward to bringing my skills and enthusiasm to your team.

MAJOR SKILLS

Field	Experience
JavaScript (ES6+)	6 years
HTML/CSS/SCSS	6 years
React.js	6 years
react-native	0.5 year
Typescript	4 years
Angular 8	1.5 year
Node.js, Express.js	4 years
Sequelize.js, Mongoose.js	4 years
GraphQL	4 years
Databases (MySQL, MongoDB)	4 years
Git	4 years

OTHERS SKILLS AND USED LIBRARIES

AWS Services (ES2,S3,Serverless et al.)

Docker

CI/CD (GitActions, CircleCI, GitLab CI/CD)

styled-component.js, react-redux, Redux Toolkit, MobX, Formik, react-apollo, apollo-client, react-query, immutable.js, lodash, knex, Passport.js, moment.js, day-fns.

Third party technology:

Facebook API, Google API, Stripe. Apple pay and Google pay with Spreedly or without.

PROFESSIONAL EXPERIENCE

Company	Community Funded
Role	Full-stack developer
Date	August 2020 - present
Responsibilities	Involved in developing back and front parts of the applications, integrating and supporting graphql server. Fixing defects, developing new features.

Company	Aimprosoft
Role	Full-stack developer
Date	July 2018 - August 2020
Responsibilities	Involved in building large scale products, design and develop back and front parts of the applications. Create precise monitoring of the solutions for effective usage and scalability.

Company	Upwork
Role	Front-End Developer
Date	January 2017 - March 2018
Responsibilities	Developing a web service for ordering and

	processing insurance for cars 'polismart.ua'.
--	-----------------------------------------------

MAJOR PROJECTS

Project #1	NDA - Platform for community support
Platform	React.js, Node.js
Databases	PostgreSQL
Technologies	React, TypeScript, GraphQL, react-apollo, knex, Webpack, apollo-client, HTML5, SCSS, ESLint
Third Parties	None
Tools	Git, VS CODE
Role	Full-stack Developer
Team size	20
Description	<p>Platform works in different direction:</p> <p>Education: Inspire your donors where it counts. Create branded, mobile-optimized fundraising pages and easily manage initiatives like crowdfunding and giving days across multiple campuses and departments. This platform integrates directly with the brand, website, and existing payment processor. Tie everything together with one seamless solution.</p> <p>Healthcare: Whether you're a hospital system, medical research facility or health-cause related organization - raising support and building a loyal engaged community is critical to the success of your mission. Create branded, mobile-optimized fundraising pages and easily manage initiatives like grateful patient fundraising across multiple campuses and units. Our platform integrates directly with your brand, your website, and your existing payment processor.</p>
Responsibilities	<ul style="list-style-type: none"> ● Support and improve graphql-server. ● Database Development ● Bugs fixing ● Develop new features on front and back

Project #2	Before the Field
Platform	React.js, React Native, Node.js
Databases	MySQL
Technologies	React, react-native, TypeScript, prisma, serverless
Third Parties	None
Tools	Git, VS CODE
Role	Full-stack Developer
Team size	5
Description	Platform that supports athletes in their development on and off the field by giving them the tools to understand who they are and share the context to their performance and their growth as a human being with the people most important to them on their journey.
Responsibilities	<ul style="list-style-type: none"> • Support and improve react-native app • Support and improve server, web and admin parts • Database Development • Bugs fixing • Develop new features

Project #3	Say2eat - Platform for restaurant business
Platform	React.js, Node.js
Databases	MongoDB
Technologies	react.js, Formik, express.js, mongoose.js, SCSS, ESLint
Third Parties	None
Tools	Git, VS CODE
Role	Full-stack Developer
Team size	7
Description	Say2eat helps restaurant chains increase direct online sales, collect valuable consumer insights and data, manage the customer relationship and maximize customer loyalty. By enabling

	personalized and fully automated conversations with customers at scale, ordering food from your favorite restaurants has become as frictionless as messaging a friend. Say2eat provides a single and seamless solution for all voice and message applications (e.g Facebook Messenger, iMessage, Amazon Echo, Google Home, etc.).
Responsibilities	<ul style="list-style-type: none"> ● Create a REST server. ● Database Development ● Bugs fixing ● Develop new features on front and back

Project #4	VTB Business (Europe) - Online banking for business
Platform	React.js
Databases	none
Technologies	React, TypeScript, MobX, Storybook, Webpack, Docker, REST, HTML5, SCSS, ESLint
Third Parties	None
Tools	Git, VS CODE
Role	Front-end Developer
Team size	38
Description	Online banking system developed for business. Viewing the status of accounts and the movement of funds on them; receipt of online account statements; preparation of documents, certification them using electronic signature and sending to the bank; display service packages; messaging with bank employees; sending documents in a free format; ability to configure system parameters; billing analytics; creating and sending currency control documents to the bank; import files from accounting systems.
Responsibilities	<ul style="list-style-type: none"> ● UI development using React.JS ● Creating MobX stores ● Creating services for interaction with API

	<ul style="list-style-type: none"> • Bugs fixing • Develop new features on front
--	----------------------------------------------------------------------------------------------------------

Project #5	Jolly days
Platform	Node.js, Angular 8
Databases	MySQL
Technologies	Express.js, GraphQL, jsonwebtoken, OAuth, Passport.js, Sequelize.js, angular/forms, primeng
Third Parties	None
Tools	Git, VS CODE
Role	Full-stack Developer
Team size	3
Description	The mission of Jollydays is to bring precisely emotions into a giftable format with its large number of reliable partners at the experience location. Choose from the practical options of the experience voucher on the one hand, which stands for a specific activity. The structure of the Jollydays shop is one of its greatest advantages: Regardless of whether you are looking for a gift for a certain person, for a special occasion or at a specific location - with Jollydays you do not have to research endlessly, you get it easily, quickly and easily the best suggestions for the gift you are looking for.
Responsibilities	<ul style="list-style-type: none"> • Create graphql-server. Its maintenance. • Database Development • Bugs fixing • Develop new features on front and back

Project #6	Viktre Solution
Platform	Node.js, React.js
Databases	MySQL
Technologies	Express.js, jsonwebtoken, Socket.IO, OAuth, Passport.js, Sequelize, Redux, redux-thunk,

	redux-form
Third Parties	None
Tools	IntelliJ IDEA 17.x, Git, VS CODE
Role	Full-stack Developer
Team size	3
Description	<p>The main goal of the project is to allow a user to make donations on the following social projects:</p> <ul style="list-style-type: none"> • A socially conscious website for people to come together to support wildlife that is threatened, support communities that work to save wildlife and to share their stories. • A socially conscious crowd-funding fan engagement technology for influencers, content creators (aspiring influencers), and brands. Their solution provides powerful digital marketing tools and services for influencers to create long-term engagement with their social media network, inspiring fans into action and helping influencers rise above the noise.
Responsibilities	<ul style="list-style-type: none"> • Creating new functionality • Creating new site versions (their maintaining) • Bugs fixing • Working with the Facebook application • Add new requests to DB and fixing on the server side

Project #7	Eloqua Connector
Platform	React.js, Java
Databases	PostgreSQL
Technologies	React-redux, react-router, redux-saga, Immutable.js, styled-components
Third Parties	None
Tools	VS CODE, IntelliJ IDEA 17.x, Git
Role	Front-End Developer

Team size	5
Description	This project is a plugin for Oracle Eloqua Platform. This plugin allows automating the localization of different content. The connectors will save time, reduce file management costs, cut down turnaround times and make localization simple. The projects are created with all the information necessary for translation. This means no human or communication errors should occur, saving you from costly rework and unnecessary delays
Responsibilities	<ul style="list-style-type: none"> ● Creating new functionality ● Bugs fixing ● Optimization application

Project #8	Company Chat
Platform	Java, ReactJS
Databases	PostgreSQL
Technologies	React, Redux, Hibernate, XML, Spring, Spring MVC, Spring Integration, Spring Boot, Spring ACL, WebSocket, OAuth
Third Parties	None
Tools	IntelliJ IDEA 16.x, Git
Role	React Developer
Team size	10
Description	This project is the collaboration hub that brings the right people, information, and tools together to get work done in the company. The chat allows you to define a unique account, fill out your profile, and manage notification settings. Also, the user can create rooms or send messages directly. Instead of a single overstuffed inbox, conversations in Chat happen in dedicated spaces called rooms. This chat makes it simple to follow conversations or find important information in an easily searchable archive. Chat could be installed on a local server and could be used only on the internet.
Responsibilities	<ul style="list-style-type: none"> ● UI development and support ● Development of new features and components

	<ul style="list-style-type: none"> ● Create tests
--	------------------------------------------------------------------

Project #9	Corporate Resume Builder
Platform	Node.js
Databases	MongoDB
Technologies	NodeJS, ExpressJS, Mongoose.js, React, Redux, LaTeX
Third Parties	None
Tools	IntelliJ IDEA 17, Git
Role	Back-end
Team size	6
Description	<p>Web application for generation employees' CVs. The main concept of this app is to simplify the process of making/editing an employee's CV. The application supports cv template processing, different types of skills and management, store previously generated data, etc. An employee has five characteristics: education, skills, projects, work experience, awards. App provides three types of roles: user, manager, admin. It has functionality allowing CRUD operations with projects and employees. It supports LDAP authentication.</p>
Responsibilities	<ul style="list-style-type: none"> ● Authentication development ● UI components development and support ● Models development

Project #10	Tour Manager
Platform	Node.js, Angular4
Databases	MySQL
Technologies	Express.js, jsonwebtoken, Socket.IO, OAuth, Passport.js, Sequelize
Third Parties	None
Tools	Git, VS CODE
Role	Full Stack Developer
Team size	2

Description	<p>If you've ever been on tour, no matter the size, you know that the hardest part is everything but the few hours you play. It's the arrangements: travel itineraries, tickets, merch stock, scheduling, interviews, lodging, guest passes, and so many more details.</p> <p>It is a platform for maintaining the relationship between tour operators and workers in the different industries.</p> <p>Easily add team members to your tour by searching. And also tour managers simplifies the recruitment of staff for the upcoming tour</p>
Responsibilities	<ul style="list-style-type: none"> ● UI and server development and support ● Add autorotation ● Create tests ● Create RESTful API
